

Ready-to-use glass slides for the detection of *Enterobius vermicularis*

- Safe and clean procedure
- Simplifies sample collection
- Avoids direct contact with the glass
- Reduces the possibility of infection
- CE IVD marked

What is our Test de Graham Safe & Clean?

The REAL Test de Graham Safe & Clean is the best solution for the detection of *Enterobius vermicularis*, consisting of a ready-to-use adhesive tape slide for easy and efficient collection.

Manufactured from the highest quality glass to ensure optimal visualisation.

This version of the device also includes our revolutionary flexible plastic green cap that facilitates collection while avoiding direct contact between the patient's skin and the glass, preventing cuts and scratches, as well as decreasing the likelihood of accidental infection during specimen collection..

What advantages does our Test de Graham Safe & Clean offer?

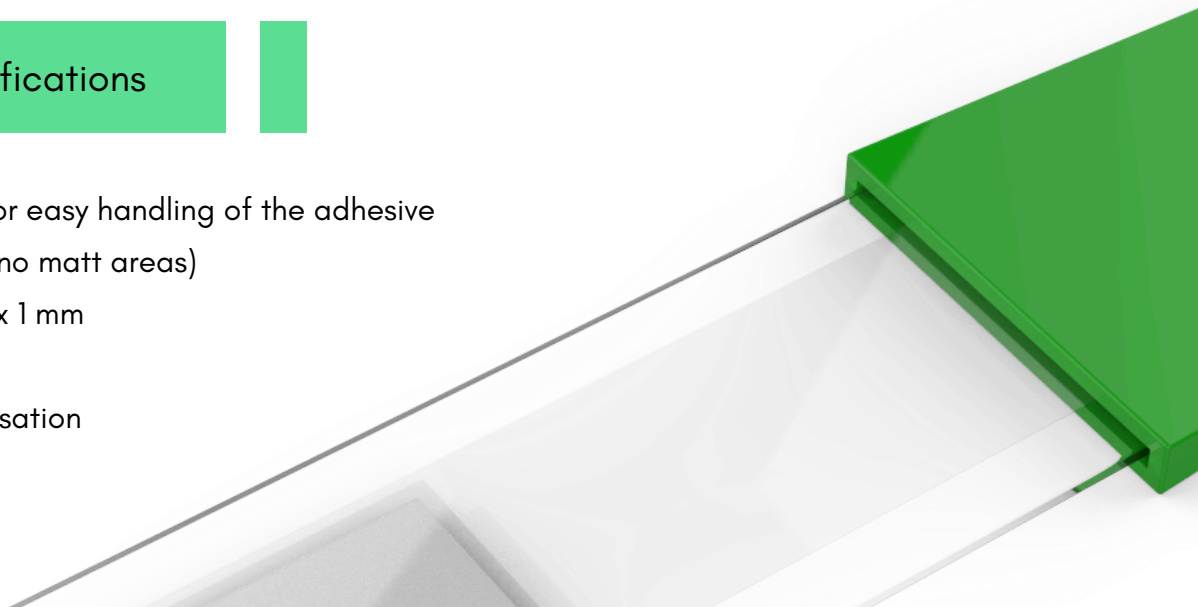

Avoids direct contact with the perianal area, minimising the possibility of contagion during sample collection.

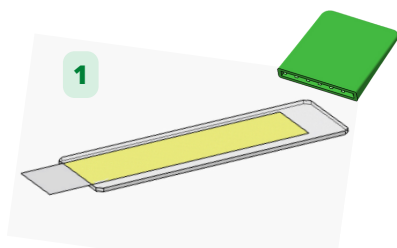

Prevents patient contact with the glass slide, preventing cuts or accidents.

Resistant plastic box that prevents breakage during transport.

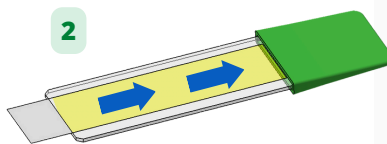

Technical specifications

- Incorporates a tab for easy handling of the adhesive
- Full display surface (no matt areas)
- Dimensions: 76 x 26 x 1 mm
- 45° frosted corners
- Possibility of customisation

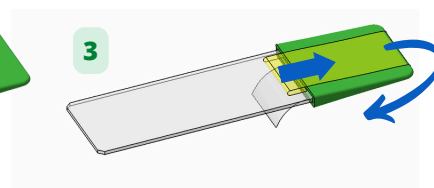

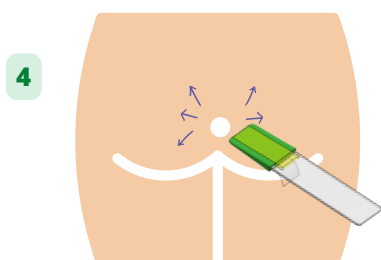

1 Place the cap in the unlabeled end of the slide.

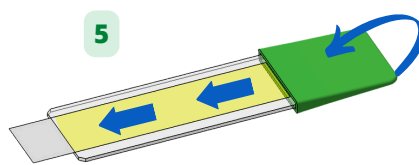

2 Peel of the tape from the slide and bring it to the cap.

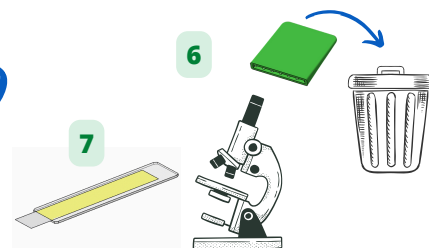

3 Place the tape over the cap.

4 Press the cap around the perianal area on the adhesive side.

5 Place the adhesive tape in its initial position, avoiding the formation of bubbles.

6 Remove the cap and discard it. Deliver the slide to the laboratory in its box.

In order to avoid accidental infections, handle carefully and wash hands thoroughly after sample collection.
